

## ***Nanjing Tech University Purchases Nanonex Advanced Nanoimprint Tool NX-B200***

**Princeton NJ, April 3, 2017.** Nanonex Corporation, the inventor of nanoimprint lithography and the world's leading provider in nanoimprint lithography solutions with the longest history, announces the purchase of Nanonex's NX-B200 system by Nanjing Tech University.

The Nanonex NX-B200 is a cost-effective and versatile full wafer nanoimprint tool with sub-5 nm imprinting resolution. It offers all forms of imprints up to 3 inch wafer size: thermal, photocurable and embossing in a compact and reliable field proven design.

Based on the Nanonex unique patented Air Cushion Press™ technology, the NX-B200 offers unsurpassed uniformity regardless of backside topology, wafer or mask flatness, or backside contamination. This ACP technology also eliminates lateral shifting between the mask and substrate, and significantly increases mask lifetime. The small thermal mass design allows fast thermal cycling, resulting in a fast process cycle.

The NX-B200 system will be installed at the Institute of Advanced Materials (IAM) of Nanjing Tech University. IAM is a recently-established research center that leads advanced materials innovations, with focuses of organic optoelectronics, organic electroluminescence display and OLEDs etc. Nanonex is thrilled to supply the advanced nanoimprint tool to Nanjing Tech University to support the cutting-edge optoelectronics research.

### **About Nanonex Corporation**

Nanonex is the inventor of nanoimprint lithography (NIL), the world's first nanoimprint lithography company, and the world's leading provider of nanoimprint solutions that include equipment, masks, resists and processes. Nanonex's patented and proprietary NIL solutions and Air Cushion Press™ can manufacture 3D nanostructures with sub-5 nm resolution, large-area uniformity, accurate overlay alignment, high throughput, and low cost. Nanonex NIL solutions have been adopted by a broad spectrum of applications, such as optical devices, data storage, displays, light emitting diodes, semiconductor ICs, bio/chemical sensors, biotech, chemical synthesis, and advanced materials. Nanonex has over 150 customers and an installed base of around 100 tools worldwide. Visit [www.nanonex.com](http://www.nanonex.com) for more information.
